### **GUJARAT TECHNOLOGICAL UNIVERSITY** BArch- SEMESTER- 2 EXAMINATION – SUMMER 2016

## Subject Code: 1025004 Subject Name: Structure – II Time:10.30AM – 12.30PM

# Date: 30/05/2016

Total Marks: 50

06

08

Instructions:

- 1. Attempt all questions.
- 2. Make suitable assumptions wherever necessary.
- 3. Figures to the right indicate full marks.
- Q.1 (a) Define the following terms: (Any Six)
  - 1. Stress
  - 2. Strain
  - 3. Modulus of Elasticity.
  - 4. Elasticity
  - 5. Principle of superposition
  - 6. Shear Stress
  - 7. Bending Moment
  - 8. Shear Force
  - (b) Explain trusses and their classification with sketch. 08

### OR

- (b) Draw the stress v/s strain curve of mild steel and mention all points. 08
- **Q.2** (a) Explain the equilibrium condition of a beam and the types of beam.
  - (b) Draw the Shear force and Bending moment diagram for a Cantilever Beam 10 shown in figure.

(b) Find the Shear force and Bending moment of figure. Draw the diagram for the 10 same and find the point of contra flexure.

**Q.3** (a) Solve figure and find the stress at each part of the bar. Take  $E = 2 \times 10^5 \text{ N/mm}^2$ . **08** 

Explain with a neat sketch the load distribution act on trusses. Explain type of **10** (b) load.

### OR

An axial tension of 50 kN is applied to a rod of 4 m length and 500 mm<sup>2</sup> cross-

(b) sectional areas. The increase in length is found to be 2mm. Calculate the values 10 of stress, strain and Modulus of Elasticity.
