## GUJARAT TECHNOLOGICAL UNIVERSITY

## **BE - SEMESTER-III EXAMINATION - WINTER 2015**

Date:02/01/2016

| Tir | U          | Name: Data and File Structure<br>2:30pm to 5:00pm Total Marks:   | <b>70</b> |
|-----|------------|--|-----------|
|     | 2.         | Attempt all questions.  Make suitable assumptions wherever necessary.  Figures to the right indicate full marks.   |           |
| Q.1 | (a)        | What does abstract data type means? Briefly explain linear and non linear data structures.   | 07        |
|     | <b>(b)</b> | Given a two dimensional array A1(1:8, 7:14) stored in row-major order with base address 100 and size of each element is 4 bytes, find address of the element A1(4, 12).        | 07        |
| Q.2 | (a)        | Write an algorithm to implement PUSH and POP Operations on Stack.  | 07        |
|     | <b>(b)</b> | Write an algorithm for evaluation of postfix expression and evaluate the following expression showing every status of stack in tabular form.  • 5 6 2 - * 4 9 3 / + *          | 07        |
|     | <b>(b)</b> | <b>OR</b> Enlist difference between recursive and iterative algorithms. Write any one recursive function showing the stack contents while function call and return.            | 07        |
| Q.3 | (a)<br>(b) | Write a program to perform insert and delete routines on a queue. Write advantages and disadvantages of linked list, doubly linked list and circular linked list with example. | 07<br>07  |
| Q.3 | (a)        | <b>OR</b> Explain priority queue and dequeue. Write an algorithm/program for insert routine in input restricted dequeues.  | 07        |
|     | <b>(b)</b> | Write a program to search an element in a linked list.   | 07        |
| Q.4 | (a)        | Create a Binary Search Tree for the following data and do in-order, Preorder and Post-order traversal of the tree. 40, 60, 15, 4, 30, 70, 65, 10, 95, 25, 34                   | 07        |
|     | <b>(b)</b> | Define the following with example :         • Strictly binary tree         • Complete binary tree  | 07        |
| Q.4 | (a)        | OR What is Binary Search Tree? Write recursive algorithm/program to implement in-order traversal of the Binary Search Tree.  | 07        |

|     | <b>(b)</b> | Define height balanced tree. Construct a height balanced binary tree (AVL tree) for the following data            | 07       |
|-----|------------|---|----------|
|     |            | 32,16,44,52,78,40,12,22,02,23   |          |
| Q.5 | (a)<br>(b) | What is hashing? Briefly explain various methods of hashing. Explain with example DFS and BFS traversal of graph. | 07<br>07 |
|     |            | OR  |          |
| Q.5 | (a)        | What is File Structure? Explain any one File Structure in detail.   | 07       |
|     | <b>(b)</b> | Show how graph can be represented using example? How path matrix can be found out using adjacency matrix.         | 07       |
