GUJARAT TECHNOLOGICAL UNIVERSITY ME - SEMESTER-I(New course) - EXAMINATION - WINTER- 2015 Subject Code: 3715106 Date: 05/01/2016 **Subject Name: Parallel Programming** Time: 2:30 pm to 5:00 pm **Total Marks: 70 Instructions:** 1. Attempt all questions. 2. Make suitable assumptions wherever necessary. 3. Figures to the right indicate full marks. Q.1 Discuss concept of parallelism. 07 (a) Discuss Gustafsongs law for scaled problems. 07 (b) Summarize all the forms of parallelism that can be exploited at different Q.207 processing levels of a computer system, including both multiprocessor and unprocessed approaches Indicate example computers that have achieved various forms of parallelism. Explain Parallel architecture. (b) 07 OR Write short note on parallelism vs Pipelining. (b) 07 **Q.3** (a) Compare distributed memory model for parallel programming in terms of 07 various parameters. Prove that a k-stage linear pipeline can be at most k times faster than that of a 07 (b) non-pipelined serial processor. OR 0.3 Write short note on cluster computing. **07** (a) Define Granularity. How it is useful in parallel computing. What is coarse **07** (b) grained and fine grained parallelism? Which one is the best? **Q.4** A large multiprocessor usually allows a larger size of the problem to be 07 undertaken in a reasonable execution time. Justify it using Gustafsonøs law. What is static and dynamic scheduling? (b) **07** OR **Q.4** (a) What is the role of interconnection of network in multiprocessor and 07 multicomputer system? Discuss cluster architecture with proper support diagram. **07** (b) **Q.5** Differentiate between data parallelism and task parallelism. 07 (a) What is blocking and non blocking Message passing. 07 (b) **Q.5** Discuss evaluation of CPU performance. 07 (a)

How message passing is done with or without SYSTEM BUFFER?

(b)

07
